

CSClear Skin Lesion Removal Aftercare Information

Proper wound care is essential
to achieve optimal results.

- Do not Pick or Scratch the area as this can lead to infection and/or scarring.
- Allow the area to heal, do not remove, rub, or squeeze any scabs.
- Avoid washing or wetting the area for 24 hours after treatment.
- Apply a small amount of the wound healing gel 2 to 3 times a day with clean hands until completely healed.
- Avoid sun exposure to the treated area until fully healed.
- Avoid tight clothing on the area during healing.
- Some lesions may require several treatments.
- Please call the salon if you have any concerns.
